

The subtlety of colour: Many of the more successful 009 model railways make best use of weathering and graduated tones, rather than solid bright tones. These two photographs, of Reinier Hendriksen's Moors End above, and Richard Glover's now defunct Pagham Harbour below demonstrate to best effect how study the study of stone finishes and the effect of plant growth can transform a model.

Next year's 009 Society's annual general meeting will be combined with Purely Narrow Gauge, the Merseyside and Southwest Lancashire group's show, at a new venue. For 1995 the show will be held in Liverpool on Saturday, April 8th at the Childwall School, using its two large halls, the smaller of which will house the AGM.

This new venue, says Stan Williams of the Merseyside group, "gives an opportunity to increase the number of layouts,

1995 009 Society AGM

Bigger, better, and still lots of fun!

trade stands and demonstrations without losing the usual informal atmosphere".

The school is located half a mile from the end of the M62 motorway and close to Broadgreen station. There is ample car parking in the school's grounds and local

shops and hostelrys are close by at the end of the road.

"I would like to thank everyone who has been in touch by phone and letters since the show in Preston," says Stan.

"It is nice to know the show is appreciated and makes all the organising worth while."

More information about Purely Narrow Gauge from Stan at 30 Griffin Close, Eccleston, St Helens, Merseyside WA10 5BL. Tel: 0744 25361.
